

What is Proletarian Feminism?

Proletarian feminism is the understanding that without the support, participation, and leadership of women, the success of proletarian revolution is impossible!

Moreover, revolution must advance both the cause of the proletariat against capitalist-imperialism and the cause of women and the gender-oppressed against patriarchy!

Only by fusing the struggle of the proletariat with the struggle of women and other oppressed groups can capitalist-imperialism be defeated and the struggle for communism carry forward!
