

Revolutionary Anti-Imperialist Movement:

National Liberation

Capitalist economies can only survive through perpetual growth. In the search for new resources to prop up their economies, capitalist nations exploit the resources of other nations. In this final phase of capitalism, imperialism, foreign labor and resources are extracted and consumed by members of the first world bourgeoisie at increasing rates.

The capitalist imperialist system cannot function without exploiting the worlds' masses and therefore has interest in the continued oppression of people all over the world. To rise up and fight for national liberation is to rise up and fight against capitalist domination.

Each person has the right to a healthy and dignified existence. As long as capitalism orders the global economic system millions will be held under its' thumb, forced to labor in deplorable conditions and forced to survive on inadequate wages.

RAIM supports national liberation groups within and outside of occupied territories who are engaged in fighting off the oppressor class. National oppression is integral to the current capitalist-imperialist world system so the fight for national liberation is inevitable in the fight against capitalism.

RAIM recognizes that revolution must come from within the ranks of the worlds' oppressed masses. The struggle for national liberation is a revolutionary struggle against imperial forces. When these revolutionary struggles are sustained they strike at the heart of capitalism. In this fight against capitalism imperialism people all over the world have found a common cause.

We are the revolutionary Anti-Imperialist Movement. We promote the revolutionary transformation of society through the global struggle of the oppressed. Find out more at revolutionaryaim.org.
